THANK YOU NOTES

GLANDER
We are overwhelmed and honored by the outpouring of love and support given to us at the time of Gene's passing.

We cannot begin to adequately express our thanks for all the cards, visits, hugs, food, flowers and memorials given in Gene's memory.

Special thanks goes to the Lake City Ambulance service, and those who cared for him at the Emergency Room in Lake City and while he was at St. Marys Hospital.

Mahn Family Funeral Home provided comfort and made beautiful arrangements, Pastor Berg had a meaningful service, Bob Wolff played lovely music, and the kitchen helpers were great.

It meant so much to us to have friends serve as pallbearers, and to have the honor guard from the VFW and American Legion present. The LaFrance ride to the cemetery with the Lake City Fire Department was the ultimate honor.

Your kindness will always be remembered.

EXTENSION INFORMATION

CONSIDER GROWING YOUR OWN VITAMINS AND MINERALS
By Mary Schroeder, Health and Nutrition Educator
U of M Extension Service

Ahh, summer is almost here, and people across Minnesota are anxiously awaiting the delicious fresh summer vegetables. In addition to the great taste, vegetables are loaded with vitamins, minerals and phytochemicals that are great for your body.

Here are a few nutrient-rich vegetables you may want to plant this summer:

Spinach: This leafy green vegetable is packed with nutrition. One cup of raw spinach contains 75 percent of your daily needs for vitamin A and 27 percent of your daily needs for vitamin C. Spinach is a good source of folate, which can reduce the risk of a baby being born with spina bifida. Spinach also contains the phytochemical lutein, which is important for eye health.

Broccoli: One-half cup of chopped, fresh broccoli contains 68 percent of your daily needs for vitamin C. Because it is a rich source of several different phytochemicals, broccoli has been shown to help reduce the risk of developing diabetes, heart disease and certain types of cancer.

Squash: There are more than 40 different varieties of squash. Summer squashes such as zucchini contain a variety of vitamins and minerals, but in much smaller amounts than winter squash. In addition to summer squash, plant a variety of winter squash such as acorn or buttercup.

Tomatoes: A garden tomato is a favorite among many people. Enjoyed fresh, it is a good source of vitamin C. Tomatoes contain the phytochemical lycopene, which has been linked to a decreased risk of developing prostate cancer. An interesting fact is that the lycopene in tomatoes is more available to the body once it has been heated. So in addition to enjoying the fresh tomato from the garden, consider processing tomatoes into canned tomatoes or spaghetti sauce.

If you do not have space for a garden, you can plant vegetables such as tomatoes and peppers in large containers. Or visit a local farmer's market to select from a wide variety of fresh vegetables.
