BEFORE AFTER

Important Facts About Indoor Air Quality

- Most people spend 60-90% of their time indoors.
- The levels of some hazardous pollutants in indoor air has been found to be up to 70 times greater than in outdoor air.
- Studies have shown that two out of three indoor air quality problems involve the HVAC/Air Duct System
- One out of six people who suffer from allergies do so because of the direct relationship to fungi and bacteria in air duct systems.

Have you cleaned your dryer vent lately?

Professional dryer vent cleaning will significantly reduce the fire hazard caused by lint accumulation and will reduce the drying time of each load, saving you money on your utility bill.

It's time to clean your dryer vent if:

- Drying clothes takes longer and longer
- Clothing is hot or damp at the end of the cycle
- Your outside vent hood flap doesn't open properly
- The outside of your dryer becomes very hot
- You notice a burning smell when drying clothes
- It's been more than a year since your last inspection
